EGNYTE

I NEED ACCESS TO COMPANY FILES!

COMMON EXPERIENCE

Where am I today?

- **Internal** → My usual office → Yes → Access files via mapped drive → This is SO slow! → Access files via mapped drive
- **Internal (Different Location)** → At a different office location other than usual → Do I have MPLS or site-to-site VPN access? → Yes → Access files via mapped drive → My network drive isn't connecting! → Open a Help Desk Ticket or call IT
- **External** → Working from home → Do I have VPN access and credentials? → Huh? → What is that? Open a Help Desk Ticket or call IT
- **External (Public)** → At a hotel or coffee shop → Do I have VPN access and credentials? → Yes → Access files via mapped drive → My network drive isn't connecting! → Open a Help Desk Ticket or call IT

This is taking too long! I'll just copy the files!

Where do I copy them to?

- Right here on my laptop → Duplicate copy created, no updates by team members.
- My personal cloud account → Duplicate copy created, no updates by team members.

Remember to save it to the mapped drive when back in the office.

Oops, I forgot.
Updated file never makes it to the correct location.

EGNYTE EXPERIENCE

Where am I today?

- **Internal** → My usual office
- **Internal (Different Location)** → At a different office location other than usual
- **External** → Working from home
- **External (Public)** → At a hotel or coffee shop

Do I prefer working in the web or mapped drive?

- **Mapped Drive** → Use the Egnyte Connect Desktop App to view, edit, share, and collaborate on files
- **Web** → Use the Egnyte Web Interface to view, edit, share, and collaborate on files.
