EGNYTE DELIVERS THE ONLY SECURE CONTENT PLATFORM THAT IS PURPOSE-BUILT FOR BUSINESSES.

PREVENT REWORK?

Egnyte's cloud-based content platform provides your team with up-to-the-minute access to drawings, model files, drone images, and more.

FILES TOO LARGE?

Many variables can impact WiFi connectivity on the jobsite, making it almost impossible to access and edit large documents. Egnyte allows you to cache files to a storage device in the trailer, giving you fast access, and providing background syncing to the cloud.

LONG CLOSEOUTS?

Increase efficiency and profitability by eliminating data silos that come from using project management, accounting, and collaboration tools. By storing content in a centralized, fully accessible, and secure cloud solution, you get retention funding more quickly.

JUGGLING SEVERAL APPLICATIONS?

Working with a myriad of software programs can create confusion, inefficiencies, and gaps in the workflow. Egnyte solves this challenge by integrating leading construction applications and productivity tools that make collaboration seamless.

TOO MUCH TIME IN THE TRAILER?

Time spent off the field can ratchet up the cost of a project very quickly. Egnyte allows tradespeople to get access to the latest files from their mobile devices.

TROUBLE CONTROLLING WHO SEES WHAT?

Allowing permissions to highly sensitive folders can be a security risk. Egnyte enables NTFS-like granular permissions that identifies who can see what, no matter what rights are inherited from parent folders.

ABOUT EGNYTE

Egnyte is the only secure content platform that is designed specifically for business. Egnyte provides teams with secure file sharing capability and access to content delivered at hyper-speed, regardless of file size, location, device or bandwidth. More than 15,000 of the world's most demanding and regulated businesses in more than 120 countries around the globe trust Egnyte to manage their content on the cloud.
