

Secure Data Management for the **AEC Industry**

Egnyte for AEC is a simple, secure data management platform, helping firms deliver projects faster, with less risk and higher profits. Thousands of leading AEC customers use Egnyte to:

- **Reduce jobsite delays and rework** with a cloud-based document collaboration and storage solution that enables users to gain immediate access to large files on-line and off.
- **Eliminate extra spend to drive higher profits** with an easy to administer file system, intuitive link-based and mobile accessible file-sharing experience, and automated project closeout and retention.
- **Prevent high value data from threats** with built-in ransomware and insider threat protection, backup & recovery, and file sharing controls.

Egnyte's Unique Approach

- Access to content from any device
- Native support for CAD files
- Support for 100's of integrations
- Ransomware detection and recovery
- Insider threat monitoring
- Map drives and globally locked files
- Project workflow management
- CMMC requirements support

The Egnyte Difference

Feature	Description
Advanced Procore Integration	Support for additional data flows between Egnyte and Procore with near real-time continuous sync.
Advanced BIM File Search	Search on and within CAD files and not just on the file names.
BIM File Preview	Preview (including rotate, zoom, orbit and measure) native industry file formats, including CAD, without the need for specialized software.
Project Lifecycle Management	Revoke permissions and sever links to project content for anyone no longer requiring access and initiate any predefined content retention, archival, and deletion management policies.
Automated Retention, Deletion & Archiving	Designate policies to retain, delete and/or archive files based on file or version creation date.
Project Folders	Designate specific folders as a project, assign status (active, closed, etc.) and start and end dates.
Advanced Ransomware Protection & Recovery	Identify and mitigate ransomware attacks and recover cryptolocker impacted data.
Digital Image Text Search	Make image and scanned document text discoverable within Egnyte Search results (such as a PDF, JPG, or TIFF).

Egnyte provides the only unified cloud content governance solution for collaboration, data security, compliance, and threat prevention for multicloud businesses. More than 17,000 organizations trust Egnyte to reduce risks and IT complexity, prevent ransomware and IP theft, and boost employee productivity on any app, any cloud, anywhere. Investors include GV (formerly Google Ventures), Kleiner Perkins, Caufield & Byers and Goldman Sachs. For more information, visit www.egnyte.com.
